

TICKET DISPENSERS - TYPE B CAPE TOWN

Panel Size:

Note three separate files for EACH side panel

Right side is a mirror image of left side (not shown)

Please include a total of 15mm bleed on all panels

Very important:

Please consider **BOLD** design elements on the side panels as they are all printed separately

ie: Panel 02 A, B and C **MUST** be separate files to facilitate printing.

The bold design will make flying (sticking) of the vinyl panels onto the paystation more manageable.

Repro Specifications:

Scans must be full colour CMYK, approx A3 at 300dpi not less than 180mb.

File Formats : Adobe Photoshop - ver3, 4, 5.5, CS3, Freehand - 8, 9, 10, 11, MX, Adobe Illustrator - 8, Corel Draw - 13, Indesign - CS3.

Convert all type to paths. Cromalin/Iris proof for colour matching purposes. May use Pantone references for spot colours, CMYK % values are not acceptable, due to differences in pigment hues from printer to printer. Bleed background to material size.

NOTES: If a document contains any scanned or raster images, supply these as separate Photoshop "tif" or "eps" files. No links should be embedded on document. Ensure document is "CMYK" not "RGB". All text must be converted to curves. Bleed must be added all round in final made up document. If no bleed is added, the file must be supplied in a layered format. All artwork must be set up to a minimum of 10% of the final size. DPI of scans should be a minimum of 300dpi and 10% of final size
